

RENEGADE PROGRESS

It is now over 25 years since I first sat down with a pair of scissors and a length of fabric and attempted to make a pair of cycle bibshorts that were better than the ones I already had. I failed.

But then I tried again...and again... and a week or two later I had a pair of bibshorts that I preferred to my original ones. And Endura was born.

A lot has changed since then. 'I' became 'We' and, as the textile industry was shutting down around us, we opened our first factory in our post-industrial Scottish heartland. We now work out of a modern premises with state-of-the-art manufacturing facilities (albeit still only a few miles from where I made those first bibshorts). Our range has grown to encompass road, MTB, commute, urban and triathlon clothing as well as categories such as helmets and eyewear that we sell across the world.

kit being so darned fast that it's been #BannedByTheUCI we have a wealth of credentials in this tribe which should be better recognized. We engineer our kit for the 'substance of advantage', and with over 25 years handcrafting custom kit for clubs and serious riders around the globe from our factory in Scotland we'll still be riding when it's no longer cool.

Five of our partner talent are Red Bull athletes, including Lucy Charles who has consistently contended at top end of the international triathlon rankings.

Today we are well along the journey towards a new chapter as part of the wider Pentland family of brands. Whilst a lot has changed, a lot has also stayed the same. Endura is still absolutely true to its founding ethos of delivering substance, innovation, reliability and performance in its products. We always see it from the perspective of the cyclist and we don't cut corners, even when it hurts. All of this is underpinned by resolutely remaining authentic in everything we do.

Most important of all, not only do we work with world class athletes, but I am now surrounded by a large and committed team of passionate people who are far more skilled than I am and who share the same "renegade progress" philosophy, always looking to push Endura on to a higher level, if at times unconventionally.

On mountain, in addition to trials and mountain legend Danny MacAskill, downhill royalty the Athertons and big mountain adventurer Harald Philipp, we have added BMX sensation Kriss Kyle and Enduro mavericks, the Dudes of Hazzard to our roster of talent partners. Our big drives this season are on protectors and helmets..... #ProtectionIsInOurDNA. We are also working really closely with the athletes on radical expressive mountain print design which illuminates their individual personalities.

Our Hardcore Roadie campaign in 2019 will bring to life the trials and tribulations of our authentic story. From kitting out Movistar Team for over four years including the current road race World Champion Alejandro Valverde to our Drag2Zero Aero

We work hard to reflect those same qualities in how we behave every day in all dealings with our retail customers. By being consistent in the support we provide to our partners like you, we are proud to have built a reputation as one of the most ethical and trustworthy brands anywhere in the cycle industry, having developed long-term trust-based relationships with thousands of retailers over the past two and a half decades.

It feels like a good time take a moment out to thank you again for your support and to let you know that we are as motivated as ever to work closely with you and your customers in the future.

We remain #AllTribesOneClan.

MT500 COLLECTION

With over 25 years of innovative craft and graft under our belt, developing serious kit for a raft of talent including Danny MacAskill and MTB sibling royalty, the Athertons, the MT500 range has never been stronger nor tougher.

Supporting the apparel, the MT500 collection also offers a solid foundation of hard core protection developed specifically to meet the varied demands of modern Enduro riding. Boasting cutting-edge tech from carefully selected partners, the MT500 helmets and body protectors are fast becoming recognised as best in class. #ProtectionIsInOurDNA

MT500 SPRAY BAGGY

An original game-changing hybrid MTB creation, the MT500 Spray Baggy has been a stalwart of the range for many years. The new 2020 version retains the much loved critical waterproofing and stretch combination, while pushing the fit, pedalling comfort and aesthetic to the next level.

SINGLETRACK

SINGLETRACK COLLECTION

Born from the long and often isolated trails of our homeland, the SingleTrack collection is built for those that ride up, down and along every trail they find. Feature rich products throughout the collection satisfy every type of trail rider and a seasonal injection of colour keeps things fresh.

SINGLETRACK SHORTS

The enduring, bombproof construction of the SingleTrack Baggy Short means that once you've bought a pair you don't need to buy another for a very long time, but often you'll WANT to own more than one pair! Our commitment to constant refinement and fine-tuning gives you the perfect excuse to buy a new pair when an update comes through and Summer 20 is one of those seasons!

The latest iteration features stretch front panels, new pocket layout and of course the trademark SingleTrack durability comes as standard.

SINGLETRACK PROTECTORS

The best-selling SingleTrack protector range sees significant design and construction updates on both standard and lite products. The addition of fresh colours provides the wild or mild options for those looking for another reason to invest in some new pads.

With an increased size range in all new products and kids' versions also available Endura protectors now cover trail riders, big and small!

HUMMVEE COLLECTION

Sometimes a 'stolen' ride is the best ride. The no-time-to-change, ride-in-what-you're-wearing kind of ride. Endura's expanded Hummvee collection is filled with casual but technical garments that outperform street fashion, leaving you ready to ride at a moment's notice.

Our Hummvee Collection has been around for nearly two decades, providing the essential kit for those who grab a ride whenever they can.

HUMMVEE LITE ICON GLOVE

The Hummvee Lite is still Danny MacAskill's favourite glove. He continues to enthuse about it when he visits our HQ near Edinburgh. It is also the go-to item for the Atherton's in a very different discipline on Downhill, highlighting its versatility and capabilities way beyond those that its Hummvee label and price tag might suggest.

So, for 2020, we've introduced for a very simple design in a wide range of colours that will match any of your favourite Endura kit, whatever type of riding you, or our host of pro athletes choose.

HUMMVEE WATERPROOF JACKET

QDC TRIATHLON COLLECTION

Tested and developed with a group of the world's top long distance triathletes, the credentials of the Endura Drag2Zero QDC products are proven at the highest level. The latest evolution of the premium suit features the exclusive SST™ technology, proven to be faster than the competition across the speed range in the aero road collection and successfully raced by Endura's triathletes for the past 2 years.

SILICONE SURFACE TOPOGRAPHY - SST™

This exclusive, patent pending technology has been developed by Endura in close collaboration with Simon Smart of Drag2Zero® and validated by the world's top road riders on the UCI WorldTour and record breaking long distance triathletes. SST™ is the result of years of R & D, studying airflow in wind tunnel in conjunction with the development of ground breaking new production methods to bring theoretical ideas to real world riding. Strategically positioned 3D chevrons positively affect airflow around the body, reducing drag at the speeds relevant to the target rider

E5059BK	QDC D2Z S/S Tri Suit II With SST™	XS - XL	£349.99
E5060BK	Wms QDC D2Z S/S Tri Suit II With SST™	XS - L	£349.99

DRAG2ZERO COLLECTION

Endura's relationship with the world's leading cycle aerodynamicist, Simon Smart, is long-established. Their earlier collaborations helped Alex Dowsett to break the World Hour Record in 2015, and Movistar Team to claim countless victories in professional cycling's elite UCI WorldTour.

The latest game-changing collection deploys patent protected Surface Silicone Topography delivering kit that is so fast its even been banned by the UCI!

PRO SL COLLECTION

At Endura we pride ourselves on engineering the substance of advantage, products that have been thoughtfully developed with the learnings from years on World Tour circuit, world records and a rack of game-changing innovation to help you progress your ride.

With over 25 years' experience of manufacturing no-nonsense, game-changing kit for the hard-core roadie here in our factory in Scotland, we'll still be riding when it's no longer cool.

PRO SL BIBSHORTS

We took the best elements of our ground breaking, multi award winning Pro SL bibshorts, scrutinised the fit, fabrics and panel design to deliver a quantum leap forward for this best-seller. A high power lumbar panel locks the short in place while the re-engineered bib provides additional lightweight support. The more aggressive silhouette eliminates groin creasing and the remastered raw edge hem removes any risk of chafing or irritation. The best just got even better!

700 SERIES PAD II

This pad boasts an impressive palmarés of test wins, powerful feedback from pro's, club riders and everyone in between. Being the go-to option for Endura's own hard-core roadies there wasn't a lot wrong with the original 700 series pad but that doesn't stop Endura looking to improve.

A new soft touch, super high wicking top-sheet, increased density foam in critical zones and a new even more breathable reticulated foam bring even more comfort on long road rides.

The options of 3 widths to match saddle and body shape and the backing of the 90 Day Comfort Guarantee remove any doubt around the comfort of this high tech pad.

ROAD

ROAD COLLECTION

Experienced roadie or ambitious newcomer, you'll find the kit you need to elevate on-bike comfort and performance in the Endura Road collections. Look out for our award-winning FS260-Pro performance best-sellers. A wide range of bibshorts and mitts provide contact point padding, jerseys offer a range of styles and colour, while a variety of jackets, gilets and other accessories deliver element protection whatever the climate.

ROAD OUTFITTING

Whether it's full matchy matchy, complimentary shades or bold graphics roadies love to outfit. That's why for summer '20 we've increased the colour options on our best-selling FS260-Pro short and Aerogel Mitts to co-ordinate across the new Clouds, Lines, FS260-Pro and Pro SL Jerseys. So stacks of options to express your individual style on the Sunday Best ride.

SHE RIDES OFF-ROAD

Because she won't compromise on performance. Our women's MT500, SingleTrack and Hummvee products embody exactly the same ethos as the men's kit. Born in Scotland, built tough and more than capable of tackling any off road challenge. Working with the most decorated female downhiller of all time, Rachel Atherton, alongside several up and coming young female riders including EWS U21 2018 champion Ella Conolly, Endura's credentials in women's MTB speak for themselves.

PROTECTORS

An essential accessory for committed women riders, Endura's growing protection range now comes in more size options to cater for everyone across the full collection. From lightweight SingleTrack Lites to the full on DH friendly MT500 Hardshell, with D3O technology, worn to DH World Cup glory by Rachel Atherton there is something for your style of riding.

#ProtectionIsInOurDNA

ROAD

SHE RIDES ROAD

At Endura we are committed to providing female road riders with levels of performance, fit and comfort matching those of their male counterparts. The introduction of the industry-first Women's Pro SL Bibshort with 3 pad width options and DropSeat™ function is testament to this. An expanded collection seeing the addition of key new pieces of top end road kit provides further evidence.

DROPSEAT™ CONVENIENCE

The radical DropSeat™ (DS) function, now with a stretch zip, provides a barely-there riding experience. Wear tested by Jenny Graham in her World Record breaking round-the-world triumph, there is now no need to semi-undress to take a comfort break. Endura has the perfect speedy solution to beat the blokes.

WOMEN'S GRAPHIC JERSEYS

With a striking summer vibe, the new women's graphics jerseys and socks provide a great excuse to buy some new kit and keep your riding wardrobe looking fresh.

WOMEN'S PRO SL S/S JERSEY II

HELMETS

HELMET RANGE

It is not by accident that Jim McFarlane chose 'endurance' and 'durability' as the two words to blend to form the Endura brand over 25 years ago. Perhaps not marketing rocket science, but they have been a constant truth throughout the company's history which is why 'Protection' is very much in our DNA. Endura helmets are worn by Danny MacAskill, Joe Barnes and Team Hazzard, Harald Philipp and Team Bigla on World Tour Road.

The MT500 Full Face helmet boasts class leading weight and amazing ventilation, made possible by the full Koroyd™ core while the chinbar features a unique construction with an internal skeleton providing the required impact protection to meet DH standards.

The Pro SL and MT500 helmets raise the safety bar with a full Koroyd™ core exploiting the benefits of this high tech material's energy absorption properties to provide protection that goes way beyond the certification requirements. The kids MT500JR provides these same levels of protection for the aspiring Danny MacAskill or Rachel Atherton.

MT500 FULL FACE HELMET

Deploying advanced energy absorber, Koroyd® to provide additional impact resistance while keeping weight to a minimum this big hitting full face delivers DH certified protection that can be worn all day long

High performance downhill style full face mountain bike helmet
Full integrated Koroyd® core for superior energy absorption
Large vents including top "air intake" zone and large diameter Koroyd tubes for increased airflow

PROTECTORS

Protection – it's in our DNA. An expanded line up of protectors ensures every type of mountain biker is catered for. We work with the best downhill athletes to develop our products including the Athertons, Hazzard Racing and the Lupato Brothers.

The SingleTrack Lite protectors offer the lightweight, flexible protection modern trail riders desire while the Hard Shell and Lite MT500 knee protectors provide options of fully certified peace of mind, in rugged, durable fabrics.

Knee pads now all come in 3 sizes, catering for a wider size range of riders and a blast of colour in the SingleTrack range makes a real impact.

MT500 PROTECTOR UNDERSHORTS II

Cat. 1 - Mixed light

Cat. 2 - Bright moderate light

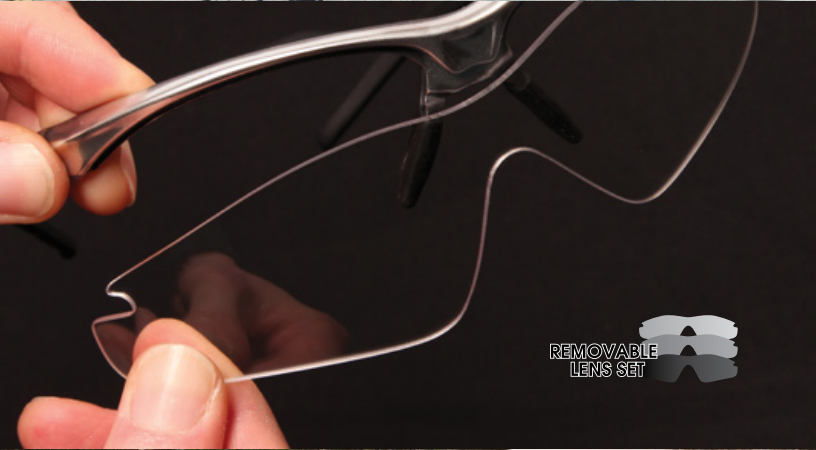

Cat. 3 - Bright light / High protection against glare

Light Reactive Plus lenses incorporate technology that allows for a particularly broad range of light filtration and so are ideal for use in widely changing light conditions. They offer full UV protection according to the standard EN1836.

Light Reactive lenses use photochromic technology for a rapid response to changing light conditions. The lenses respond in 7 seconds to light exposure and offer full UV protection according to the standard EN1836.

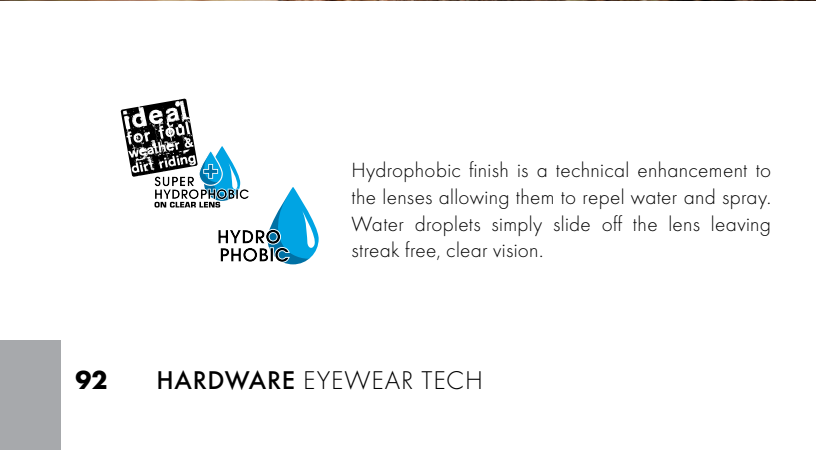

REMOVABLE
LENS SET

VENTED
LENSES

A functional anti-fog finish on the inside of the lenses resists misting from perspiration (aided by vented lenses on certain models). This helps provide unimpaired vision, particularly when stopping and starting on the bike.

Hydrophobic finish is a technical enhancement to the lenses allowing them to repel water and spray. Water droplets simply slide off the lens leaving streak free, clear vision.

BASELAYERS

The foundation of any technical apparel layering system, the base layer is arguably the most important part is and can make or break the outfit. For warm weather and high intensity riding the super high wicking and fast drying Fishnets and Translite are ideal.

Mid weight man made products like the Engineered Baselayer make a great all-rounder with a fantastic fit, while BaaBaa Merino blends provide excellent insulation and temperature regulation.

Endura have a base layer for all weathers and effort levels!

DANNY’S FAVOURITE GLOVE

The Hummvee Lite is still Danny MacAskill’s favourite glove. He continues to enthuse about it when he visits our HQ near Edinburgh. It is also the go-to item for the Atherton’s in a very different discipline on Downhill, highlighting its versatility and capabilities way beyond those that its Hummvee label and price tag might suggest.

So, for 2020, we’ve introduced for a very simple design in a wide range of colours that will match any of your favourite Endura kit, whatever type of riding you, or our host of pro athletes choose.

HUMMVEE LITE ICON GLOVE
Danny MacAskill’s Favourite Glove EVER!

4 way stretch, breathable lightweight mesh backhand
Pull on stretch cuff
Durable synthetic leather palm with laser cut perforations for ventilation
Zero padding for maximum dexterity and bar feel
Silicone print palm and fingertips for grip
Terry sweat wipe on thumb
Danny MacAskill’s favourite - Need we say more?

MT500 PLUS OVERSHOE II
Exclusive Flat Pedal Friendly, Mud Protection for Your Kicks

Super tough, nylon faced neoprene upper with highly durable overlays
Exclusive, hardwearing rubber open sole for flat or clipless pedals
Aggressive rubber toe section for added grip
Rear double Velcro® closure with fit adjustment
Wide fit, suitable for varied MTB flat pedal and clipless shoes - Check out the fitting tips video
Clean shoes, clean lines, muddy trails
Due to the variety of shoe profiles check compatibility with your shoe by trying on before buying

SIZES S-M, M-L, L-XL, XL-XXL

MT500 OVERSHOE II
Rugged Protection

Tough nylon faced neoprene upper
Rear zip with snapdown puller and Velcro® heel tab to ensure snug fit
Moulded rubber toe cap with ridged underside to help when climbing steep and/or muddy slopes
Neoprene meets behind the zip to improve water tightness
Welded centre seam for smooth finish and improved water protection
Hard wearing aramid sole and stitching using aramid thread
Reflective logo and rear zip panels
Suitable for MTB cleats only
Say goodbye to muddy shoes!

SIZES S, M, L, XL, XXL

WP GAITER OVERSHOE
Extended Waterproof protection

Full length Velcro® closure at rear
Reflective logo and panels at rear
Elasticated stirrups
Durable 3 layer nylon sole
Suitable for a variety of footwear and cleats

SIZES S, M, L, XL, XXL

URBAN LUMINITE OVERSHOE
Waterproof Commuter Footwear Protection

Stretch waterproof PU fabric with taped centre front seam
Extensive 360 degree reflective trims on front side and rear
Seams flatlocked for additional durability
Opens fully at sole and up back heel with Velcro® fastening for adjustable fit
Stretch aramid abrasion resistant sole and toe
Suitable for all kinds of footwear and cleats

SIZES S, M, L, XL, XXL

FREEZING POINT OVERSHOE

Insulated winter protection

Fleece lined neoprene construction
Rear zip with snapdown puller and Velcro® heel tab to ensure snug fit
Hard wearing aramid sole and stitching using aramid thread
Reflective logo and rear zip panels
Dodge frostbite this winter!

ENDURA CLEANERS & RE-PROOFERS

Here at Endura not only do we love being outdoors but we are also passionate about protecting the environment, that's why our latest generation of fabrics are all PFC free.

As active outdoor consumers, to retain the performance benefits of our favourite apparel, we need to keep our garments re-proofed with more regular applications of products that are gentler on the planet than previously.

Show some love for both the planet and your most cherished kit with the brand new collection of Endura Cleaners and Proofers.

APPAREL RE-PROOFER

Simple Spray-on DWR Treatment Maintains Waterproof and Breathable Performance

Specially formulated to restore the Durable Water-Repellent (DWR) finish found on technical waterproof clothing
Fluorocarbon-free and environmentally responsible
Suitable for use on all ExoShell™ garments
Effective without heat activation

SIZES **One size**

EXO-SHELL 60

ExoShell60™ fabric achieves a colossal breathability rating of up to 60,000g/m²/24hr. The key to the ExoShell60's impressive breathability lies in the ultrafine, fluorine free membrane which is up to 50% thinner than standard membranes, protected by a super-fine denier tricot laminate. The breathability is further enhanced by the impregnation of a proprietary compound which stimulates the moisture transmission. The progressive construction of ExoShell60™ not only provides impressive breathability ratings but at a mere 105gsm, it boasts an incredible durability to weight ratio.

Dark colours attain a higher temperature than light colours when exposed to the same intensities of direct sunlight. coldblack® technology textile finishing reduces this effect by increasing the amount of infrared and ultraviolet UV rays that are reflected from the fabric's surface, thereby dramatically reducing the sunlight heating effect. coldblack® also provides reliable protection from UV rays (minimum UPF 30).

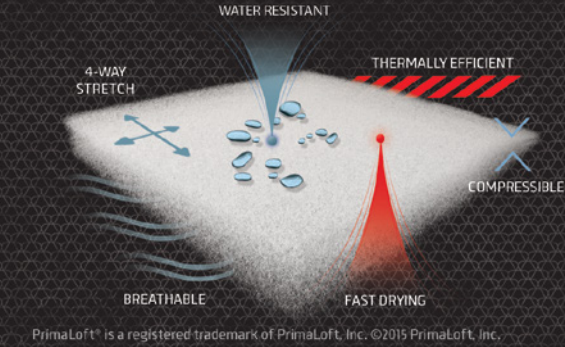

EXO-SHELL 40

Using an innovative 3 layer construction and weighing in at only 70gsm ExoShell40™ delivers a formidable combination of minimal pack size, immense breathability and high durability. The key to the ExoShell40's impressive breathability rating of 40,000g/m²/24hr and waterproof rating of 20,000mm lies in the ultrafine, fluorine free membrane which is up to 50% thinner than standard membranes, protected by a super-fine denier tricot laminate and impregnated with a proprietary compound enhancing moisture transfer.

PRIMALOFT® GOLD INSULATION ACTIVE

Primaloft insulation boasts an exceptional warmth to weight ratio, tiny pack size, extremely breathable construction and is highly water resistant making it a tremendously versatile performance insulator. Primaloft® yarn found in Pro SL Winter Socks enhances moisture transfer and provides a fantastically soft feel.

EXO-SHELL 25ST

For high stretch, wind and waterproof comfort the ExoStretch25ST™ is hard to beat. A bonded softshell delivering exceptional breathability performance of 25,000g/m²/24hrs provides an unbelievable combination of flap free, athletic jersey fit and waterproof jacket protection. Developed with Movistar Team, ridden in the harshest conditions by the world's best riders, ExoStretch25ST™'s credentials are thoroughly proven.

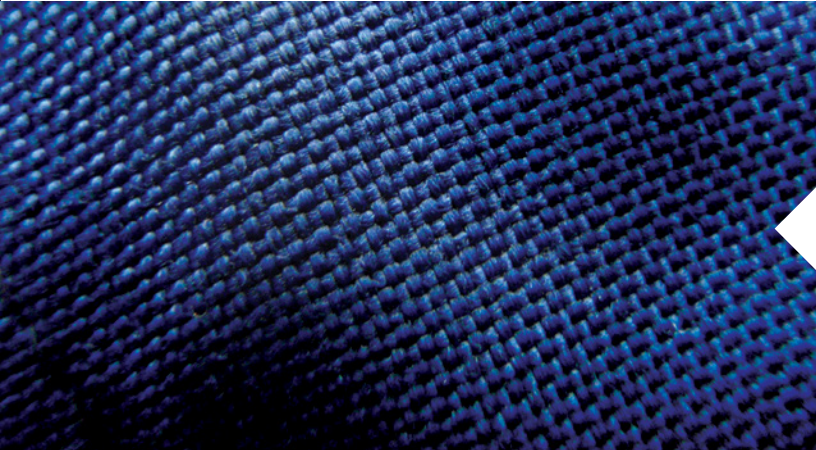

DWR M™, developed by M.I.T.I. Spa, is an eco-friendly treatment which provides a high performance water repellent layer. Bluesign® approved and PFC free, this advanced technology protects the environment and the rider.

EXO-SHELL 20ST

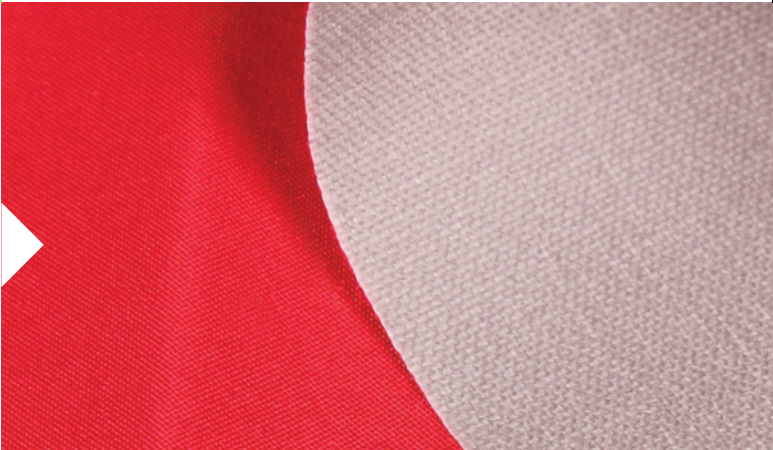

Developed with racing in mind, the translucent properties of Exoshell20ST™ mean that we'll always have your number, no matter how bad the weather. By virtue of a high denier mesh construction, it is a supremely light-weight and packable fabric that makes for rapid deployment and micro pack size when not required while built in stretch ensures a true race fit- the perfect year round jersey pocket companion.

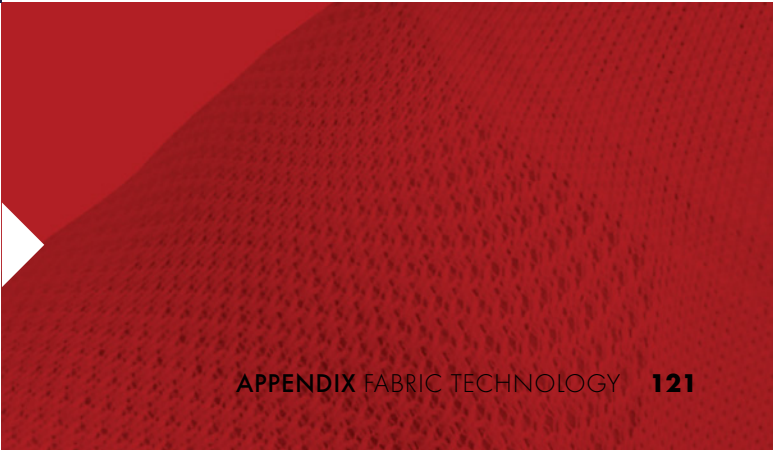

Cordura offers rugged durability and lightweight strength, being resistant to abrasions, tears and scuffs.

EXO-SHELL 20

With an extremely soft, noise free outer face fabric and a superfine denier tricot inner layer sandwiching the thin PU membrane, Exoshell20™ exceeds expectations of comfort and performance. The 10,000mm waterproof rating ensures water doesn't get in and a best in class breathability of 20,000g/m²/24hr keeps you dry from the inside.

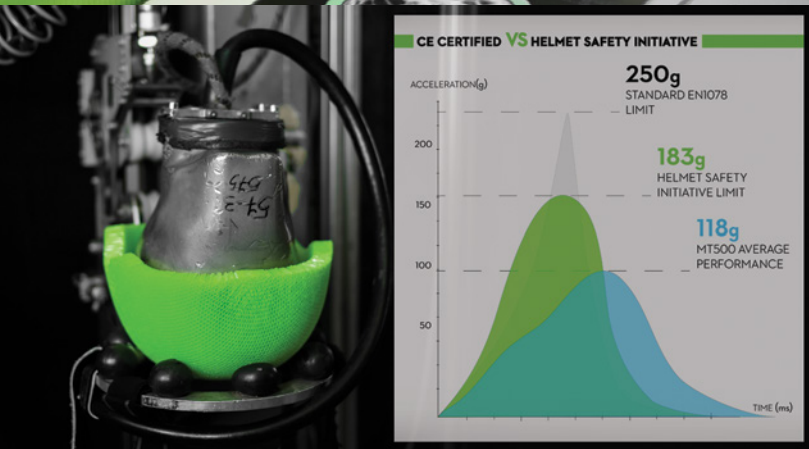

Meryl fabric contains particularly fine fibres, producing a lightweight fabric characterised by soft handle, breathability and resistance to wind and rain.

SURFACE SILICONE TOPOGRAPHY - SST™

This exclusive, patent pending technology has been developed by Endura in close collaboration with Simon Smart of Drag2Zero® and validated by the world's top road riders on the UCI WorldTour. SST™ is the result of years of R & D, studying airflow in wind tunnel in conjunction with the development of ground breaking new production methods to bring theoretical ideas to real world riding. Strategically positioned 3D chevrons positively affect airflow around the body, reducing drag at the speeds relevant to the target rider.

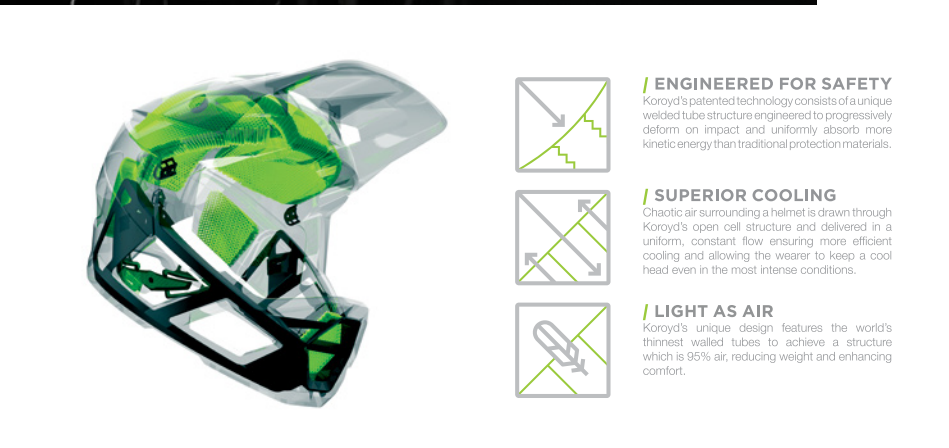

KOROYD TECHNOLOGY ENGINEERED PROTECTION

Endura/Koroyd® helmets use 3D formed Koroyd® inserts for enhanced airflow and improved energy absorption in an incredibly lightweight package. This creates the most breathable and lightweight helmets on the market while also providing superior impact protection over standard construction.

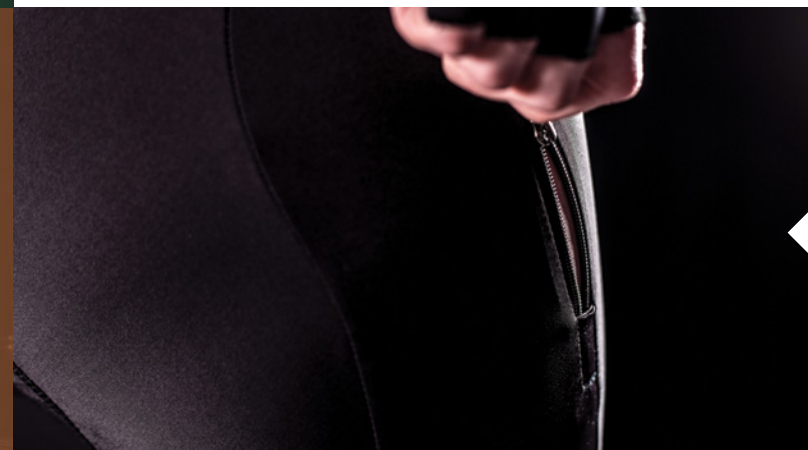

ENCAPSULATOR POCKET

Initially banned, then accepted, by the UCI the Encapsulator pocket has had a short, but controversial life. The super fine, translucent mesh allows race numbers to be clearly visible while retaining the breathability of the pocket area around the number. Providing a simple solution to the challenge of neatly attaching a race number, the Encapsulator pocket also protects the delicate fabrics from the damage caused by pins.

ENDURA CLICKFAST™

All Endura Baggy Shorts with the "Clickfast™ compatible" logo are Clickfast™ ready. These can be worn with any Endura Clickfast™ undershort or liner. Some Endura ranges already include a Clickfast™ liner and are marked with the "Comes with liner" logo.

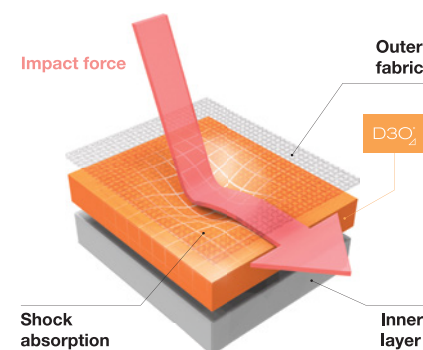

ENDURA DROPSEAT™

One feature unique to Endura's Women's lycra offer is our exclusive DropSeat™ System consisting of a comfortable stretch zip around the back of the garment, facilitating quick and easy comfort breaks without the need to strip off jerseys and jackets.

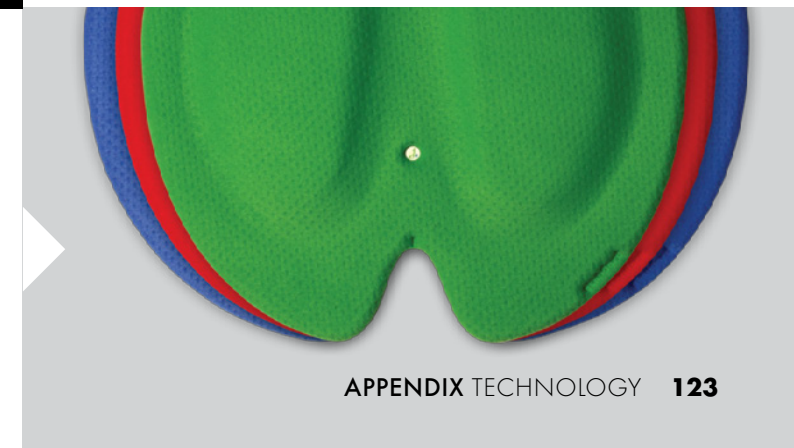

D3O®

D3O uses patented, patent-pending and proprietary technologies to make rate-sensitive, soft, flexible materials with high shock absorbing properties. D3O's core technology applies non-Newtonian principles to materials which are engineered for shock absorption. Non-Newtonian materials stiffen on impact to dissipate impact energy and reduce transmitted force, before returning to their flexible state.

MULTI PAD-WIDTH OPTIONS

Choose the pad width that best matches the geometry of your pelvis to reduce pressure peaks, the key to improved comfort. Endura's 700 series pad has been developed through scientific testing in collaboration with gebioMized® and pro rider feedback. For best fit visit an Endura® GebioMized® PadFit™ Centre.

MEN’S 1000 SERIES AERO PAD

The 1000 series Italian stretch pad features Continuously Variable Profile (CVP) technology. Unlike traditional layered pads, this avoids clunky steps in pad thickness. TRS perforated foam “dermis” layer positioned under the face for improved blood flow and dryness especially on longer rides. The BioCeramic® high stretch, fast wicking face fabric incorporates a permanent antibacterial finish, completing one of the most advanced pads in existence. The “Aero” version of the pad, used in the D2Z® Roadsuit and Encapsulator Suit™ is specially shaped to suit to the more aggressive riding position.

MEN’S 400 SERIES GEL

Moulded stretch pad in a plush microfibre face fabric for luxurious comfort with strategically positioned gel inserts. Maximum thickness of 15mm with antibacterial and wicking finish and dimpled structure to improve comfort on pressure points.

MEN’S 700 SERIES II

This pad boasts an impressive palmarés of test wins, powerful feedback from pro’s, club riders and everyone in between. Being the go-to option for Endura’s own hard-core roadies there wasn’t a lot wrong with the original 700 series pad but that doesn’t stop Endura looking to improve. A new soft touch, super high wicking top-sheet, increased density foam in critical zones and a new even more breathable reticulated foam bring even more comfort on long road rides. The options of 3 widths to match saddle and body shape and the backing of the 90 Day Comfort Guarantee remove any doubt around the comfort of this high tech pad.

MEN’S 300 SERIES

Moulded stretch pad in a plush microfibre face fabric for excellent comfort. The pad has a maximum thickness of 12mm and features antibacterial and wicking finish with dimpled structure to improve comfort on pressure points.

MEN’S 600 SERIES GEL

The updated 600 series Italian stretch pad features Continuously Variable Profile (CVP) technology and is sculpted from a single block of foam, with gel inserts for extra comfort. A TRS perforated foam “dermis” layer is positioned under the face for improved blood-flow and wicking especially on longer rides. Super-soft fast-wicking microfibre face fabric with permanent antibacterial finish. Front mesh panel improves air circulation and anatomic 3D shape

MEN’S 200 SERIES

Moulded pad in a comfort-wick fabric which transports moisture rapidly to keep the skin dry. This compact pad is 9mm maximum thickness with antibacterial finish and dimpled structure to improve comfort on pressure points.

MEN’S 500 SERIES

If you are riding in hot climate zones, temperature regulation is the most critical challenge. The pad is one of the key areas where heat build-up can cause core body temperatures to rise adversely. The new Endura 500 series pad used in the Xtract Lite collection tackles the problem head-on, incorporating a new generation of water expelling foams. DisperseFoam™, a global exclusive for Endura, features a disruptive foam cell construction which provides superior drying and dramatically improved air permeability compared to conventional PU foams. The smooth, Continuously Variable Profile and high stretch properties reduce the risk of chafing, ensuring comfort in the saddle. It also features a silver yarn fabric with cool touch, rapid drying and permanent antibacterial properties.

MEN’S QDC TRI SERIES

Designed to meet the needs of the world’s top professional long distance triathletes the QDC Tri pad features Endura’s exclusive water expelling DisperseFoam™ technology and a water repellent top sheet for incredible swim to bike comfort. The minimal padding is shaped in a smooth Continuously Variable Profile ensuring optimal support on the bike and minimal impact on the run.

MEN’S 500 SERIES MTB

The demands of mountain biking on a pad are very different to those on the road, with less time generally spent in the saddle and more freedom of movement required. The 500 Series MTB pad was specifically developed to meet these demands, with a smaller footprint, highly flexible, multi-density construction and a super soft, cool touch fabric topsheet. This pad features Endura’s DisperseFoam™ which provides superior drying and dramatically improved air permeability compared to regular foams which is especially important when worn under a baggy short which can lead to excessive heat build- up.

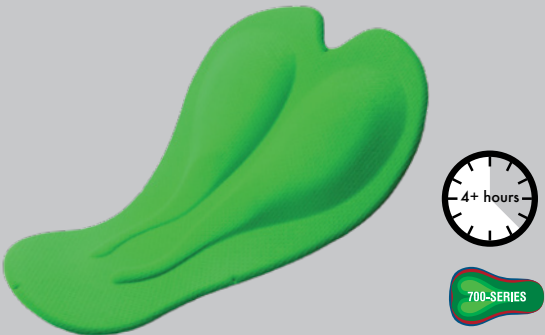

KID’S 400 SERIES GEL

Moulded stretch pad in a plush microfibre face fabric for luxurious comfort with strategically positioned gel inserts and antibacterial finish.

WOMEN’S 700 SERIES

Scientifically developed with bike fit experts gebioMized and feedback from Endura’s female pro atheletes the women’s 700 series pad shares the same market leading features as the men’s, re-shaped specifically for the female form. All sizes are available in three widths to allow a near perfect body match based on the rider’s body geometry, saddle and riding position. Endura’s high tech Continuously Variable Profile (CVP) technology provides supportive padding only where required, with all superfluous material removed to minimise bunching and friction and maximise moisture transfer and flexibility. The high stretch, antibacterial, fast wicking polyamide/ Lycra face fabric and multi-density, open-cell foam sandwich with flame lamination bonding provide outstanding stretch and moisture transfer.

WOMEN’S 300 SERIES MINI

Ergonomcially designed to mould to the female form, this moulded stretch pad in a plush microfibre face fabric offers a high level of comfort. This 12mm thick pad incorporates antibacterial and wicking finish making it well suited to medium length rides.

WOMEN’S 600 SERIES

Ergonomically designed to mould to the female form, this Italian 3D multi density stretch pad incorporates Silver Dry® antibacterial technology for enhanced hygiene. Multidensity foam construction with gel inserts provide excellent comfort for endurance riding.

WOMEN’S 200 SERIES

Ergonomcially designed to mould to the female form, this moulded pad in a comfort-wick fabric transports moisture rapidly to keep the skin dry. This is a compact pad of 8mm maximum thickness with antibacterial finish making it ideal for short to medium length rides of 1-2 hrs.

WOMEN’S 500 SERIES

If you are riding in hot climate zones, temperature regulation is the most critical challenge. The pad is one of the key areas where heat build-up can cause core body temperatures to rise adversely. The new Endura 500 series pad used in the Xtract Lite collection tackles the problem head-on, incorporating a new generation of water expelling foams. DisperseFoam™, a global exclusive for Endura, features a disruptive foam cell construction which provides superior drying and dramatically improved air permeability compared to conventional PU foams. The smooth, Continuously Variable Profile and high stretch properties reduce the risk of chafing, ensuring comfort in the saddle. It also features a silver yarn fabric with cool touch, rapid drying and permanent antibacterial properties.

WOMEN’S QDC TRI SERIES

Designed to meet the needs of the world’s top professional long distance triathletes the QDC Tri pad features Endura’s exclusive water expelling DisperseFoam™ technology and a water repellent top sheet for incredible swim to bike comfort. The minimal padding is shaped in a smooth Continuously Variable Profile ensuring optimal support on the bike and minimal impact on the run.

WOMEN’S 400 SERIES GEL

Ergonomcially designed to mould to the female form, this moulded pad in a plush microfibre face fabric offers luxurious comfort with strategically positioned Gel inserts. Maximum thickness of 15mm with antibacterial and wicking finish.

KID’S 400 SERIES GEL

Moulded stretch pad in a plush microfibre face fabric for luxurious comfort with strategically positioned gel inserts and antibacterial finish.

WOMEN’S 300 SERIES

Ergonomcially designed to mould to the female form, this moulded stretch pad in a plush microfibre face fabric offers a high level of comfort. This 12mm thick pad incorporates antibacterial and wicking finish making it well suited to medium length rides.

instructions. The garment should be clean and dry before starting this process. Be sure to avoid areas that are not made of fabric (eg. buttons and zippers) and stand well back to avoid inhaling chemicals. Also be aware that these products may be flammable.

GENERAL FABRIC CARE

There are some simple rules to follow when washing your Endura garments, to ensure a long life for the garment and that they are cleaned effectively without damaging their technical properties.

- After use, do not leave the garment rolled up in a wet state, as this will encourage bacteria and mould, membrane delamination and/or colour migration.
- Always follow the washing instructions on the garment label, if these cannot be found, then you can contact CS@endura.co.uk
- All garments that can be machine washed should be washed at 30°.

- Always wash dark colours separately.
- Do not use fabric conditioner as this will damage the adhesion of seam tapes on waterproof fabrics and can also damage DWR (Durable Water Repellency) coatings.
- Do not tumble dry. Instead, drip dry naturally but avoid drying in direct strong sunlight.
- Do not dry clean.

To reactivate the DWR (Durable Water Repellency) on waterproof garments, use a cool iron setting, if that is permitted on the care label. Garments can also be reproofed using waterproofing agents such as Nikwax or Granger's. Always follow the application
